

# HOW TO PLAY

## HI-LO CARD GAME

- Each chosen contestant will choose one (1) card from the 52-card deck as a starting card. This card will be revealed and placed on the game board.
- The attendant will then place four (4) face down cards from the same deck on the game board.
- The contestant will predict if the card to the right will be a higher or a lower face value than the revealed card on the left.
- The attendant will place a high or low maker above the face down card to indicate the contestant's choice.
- The attendant will then reveal the card and determine if the guess was correct or incorrect. A check mark will be placed under the card if the guess is correct, and an X will be placed if the guess is incorrect.
- The total correct guesses will determine the maximum number of prizes the contestant can choose from the prize board.
- A \$50 bonus will be awarded to the final prize amount if the contestant guesses all four (4) cards correctly.
- Aces have a value of 1 for the purposes of Hi-Lo Game.
- If the revealed card has the same value as the previous card, it is considered a win for the contestant. The game will proceed in an ordinary fashion after this occurrence.

## PRIZE BOARD PICK'EM

- After completing the Hi-Lo game, the contestant will move on to the prize board and pick out the total amount of sharks won on the Hi-Lo game.
- The attendant will then reveal the first contestant chosen shark silhouette and show this amount to the contestant.
- The contestant will have the option to take the revealed prize amount or discard the prize and move on to the next prize, if available.
- The contestant will have the option to continue to discard the prizes, until the final prize is revealed.
- If the contestant discards all the prizes, the final revealed prize will be awarded.
